

LUIS ENRIQUE HERNÁNDEZ TAAPIA

SOFTWARE & NETWORK ENGINEER | AUTOMATION

Ciudad de México, CDMX • +52 5536993207 • tapia641@gmail.com • [linkedin.com/in/hetl-tapia](https://www.linkedin.com/in/hetl-tapia) • tapia641.github.io/my-portfolio/

EDUCATION

Instituto Politécnico Nacional (IPN)

Bachelor of Computer Systems Engineering | 2016 – 2022

- Higher Computer Educational Center (ESCOM).

EXPERIENCE

SDN & Automation Engineer

UY Remote | January 2024 – June 2026

Quantik - Isbel

- Orchestrated and analyzed network architectures, interfaces, and VLANs across cloud-native telecom data centers using Nokia EDA (Event Driven Automation) and SR Linux (SRL).
- Engineered automated infrastructure validation suites and end-to-end testing frameworks using Python to eliminate deployment downtime during system upgrades.
- Architected and executed continuous integration testing models utilizing Java, Selenium, and Aquality Framework for web-based platform configurations.
- Optimized legacy enterprise backend components utilizing JCL, Cobol II, and high-performance DB2/SQL data processing pipelines.

Network Automation Engineer & Customer Support I

CO Remote | October 2021 – December 2023

Nokia & Indeplo

- Designed and executed massive-scale network integrations for Tier-1 multi-national operators, including Orocom Peru, Claro Argentina, and Claro Colombia.
- Deployed Software-Defined Networking (SDN) solutions across core infrastructures utilizing Nokia Nuage Virtualized Services Controller (VSC) and Virtualized Network Services (VNS).
- Automated compliance verification and diagnostics protocols, reducing manual configuration errors and standardizing Method of Procedure (MOP) execution.
- Earned the "Best Assisted Operation for the Customer" award (LAT Operations Delivery) and recognized as part of the "Best Network Integration Team" (Town Hall Colombia).

Nuage Customer Intern

MX Remote | January 2021 – September 2021

Nokia Operations de México

- Built and provisioned thousands of Nuage network subnets via automated Python and Ansible workflows, driving a 50% reduction in deployment life-cycles.
- Programmed platform integrations by programmatically consuming REST APIs to synchronize real-time configuration compliance tracking under a Scrum framework.

Software Developer I & II

MX Remote | March 2020 – January 2021

Sec360 & Whitesecurity

- Architected a distributed SaaS infrastructure platform for secure, remote auditing of enterprise Linux nodes utilizing Spring Boot, MySQL, and automated Bash telemetry scripts.
- Developed responsive web compliance services aligned with Mexico's Normas Oficiales Mexicanas (NOMs), implementing dynamic forms with Java and Bootstrap to maximize auditing efficiency.

CERTIFICATIONS

- Google Cloud Computing Foundations – Google Cloud Academy (Badges in Infrastructure, Data, ML, Networking, and Security)
- AWS Cloud Practitioner Essentials – AWS Skill Builder
- AWS Engineering Learning Series – Amazon (Workshops on Elastic Container Registry and Cloud Architectures)

TECHNICAL SKILLS

- Automation & DevOps: Ansible Playbooks, Terraform, Docker, Kubernetes, Containerlab, Bash Scripting, Git Version Control, Jira.
- Networking & SDN: Nokia EDA, SR Linux (SRL), Nokia SROS, Nuage VSC/VNS, Routing & Switching, Network Protocols, SDN Architecture, MOPs/Documentation.
- Programming & Frameworks: Python 3, FastAPI, Java, Spring Boot, Selenium Framework, Cobol II, JCL.
- Cloud & Infrastructure: Google Cloud Platform (GCP), AWS, DB2/SQL, MySQL, Linux CentOS, KVM.
